# SAFETY INFORMATION

A

**CAUTION**

This service manual is intended for qualified service technicians; it is not meant for the casual do-it-yourselfer. Qualified technicians have the necessary test equipment and tools, and have been trained to properly and safely repair complex products such as those covered by this manual. Improperly performed repairs can adversely affect the safety and reliability of the product and may void the warranty. If you are not qualified to perform the repair of this product properly and safely, you should not risk trying to do so and refer the repair to a qualified service technician.

**Where in a manufacturer’s service documentation, for example in circuit diagrams or lists of components, a symbol is used to indicate that a specific component shall be replaced only by the component specified in that documentation for safety reasons, the following symbol shall be used:**

# 1. SERVICE PRECAUTIONS

## 1.1 SERVICE PRECAUTIONS

- You should conform to the regulations governing the product (safety, radio and noise, and other regulations), and should keep the safety during servicing by following the safety instructions described in this manual.

## 1.2 NOTES ON DISASSEMBLY / ASSEMBLY

- Before disassembling the unit, be sure to turn off the power. Unplugging and plugging the connectors during power-on mode may damage the ICs inside the unit.
- Please be sure to conduct line process to original status if you make assembling after repair.

## 1.3 NOTES ON REPLACING PARTS

- Be careful in handling ICs. Some ICs such as MOS type are so fragile that they can be damaged by electrostatic induction.
- Please be careful of not to apply static charge onto integrated circuits, etc, when you conduct repair work. Especially, please use soldering iron with its tip grounded. Also, please use a pair of tweezers with static charge protection capability if there is the possibility of contacting to device terminals, and avoid the use of metal-made tweezers.

## 1.4 NOTES ON ADJUSTMENT

- There is not information to be shown in this chapter.

## 1.5 OTHERS

### ● Notes on soldring

For environmental protection, lead-free solder is used on the printed circuit boards mounted in this unit. Be sure to use lead-free solder and a soldering iron that can meet specifications for use with lead-free solders for repairs accompanied by reworking of soldering.

## 2. SPECIFICATIONS

### 2.1 SPECIFICATIONS

For all items except the backup current, refer to the Owner's Manual.

Backup current..... 2.5 mA or less

### 2.2 DISC/CONTENT FORMAT

## 3. BASIC ITEMS FOR SERVICE

### 3.1 CHECK POINTS AFTER SERVICING

To keep the product quality after servicing, please confirm following check points.

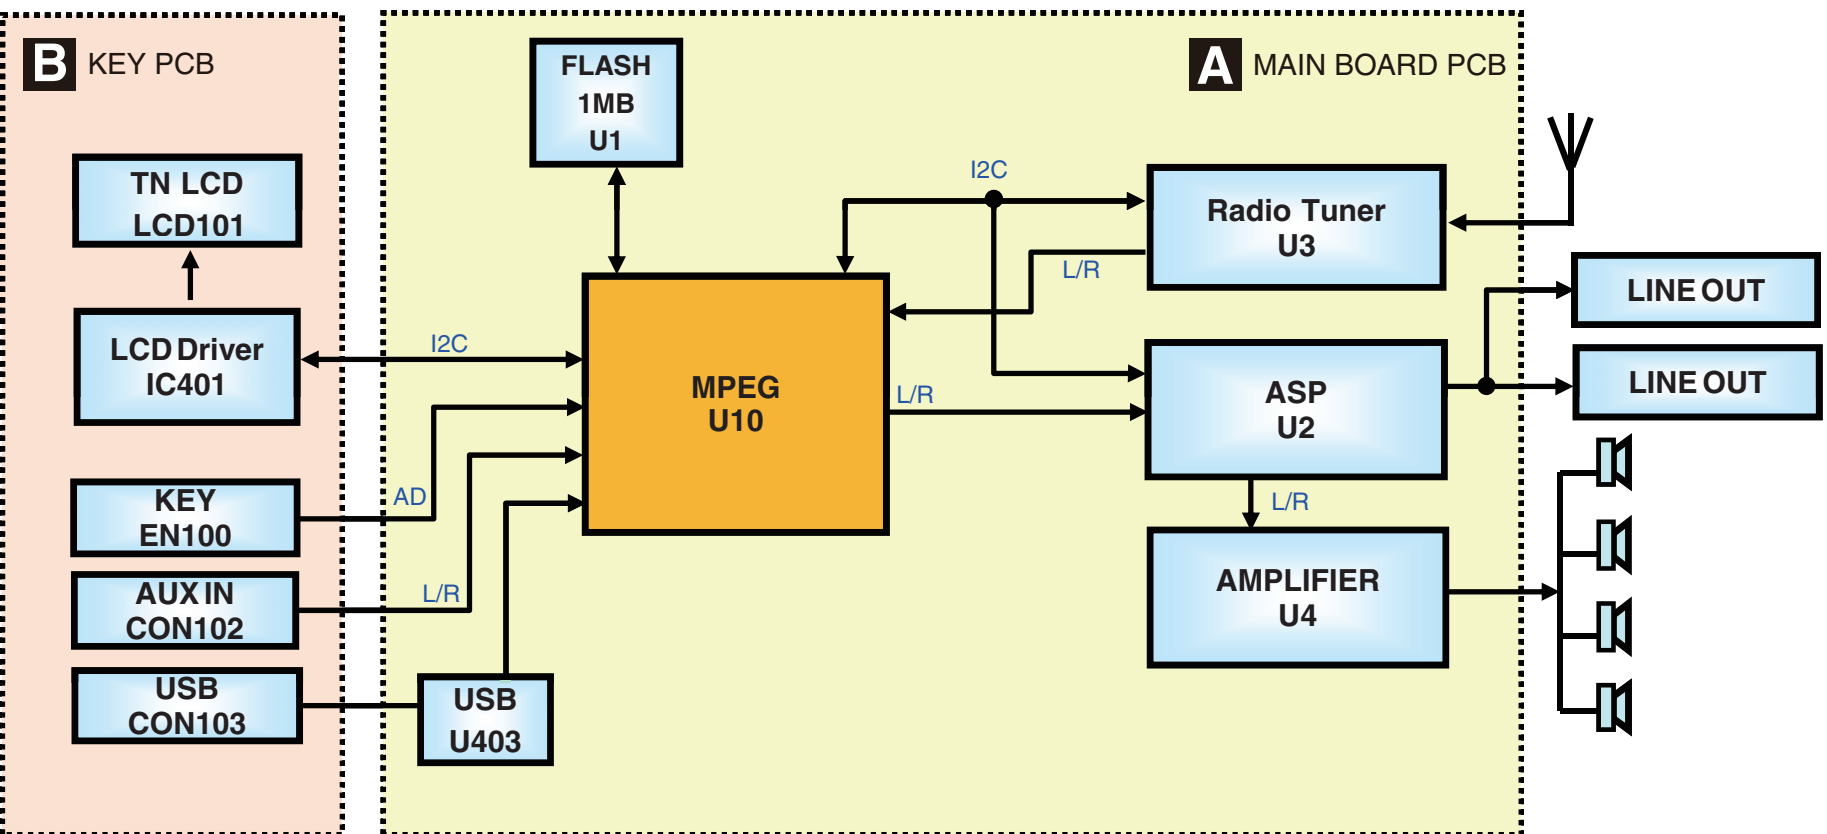

No.		Procedures	Item to be confirmed
1		Confirm whether the customer complain has been solved. If the customer complain occurs with the specific media, use it for the operation check.	The customer complain must not be reappeared. Display, audio and operations must be normal.
2	FM/AM tuner	Check FM/AM tuner action. (Seek, Preset) Switch band to check both FM and AM.	Display, audio and operations must be normal.
3		Appearance check	No scratches or dirt on its appearance after receiving it for service.

See the table below for the items to be checked regarding audio:

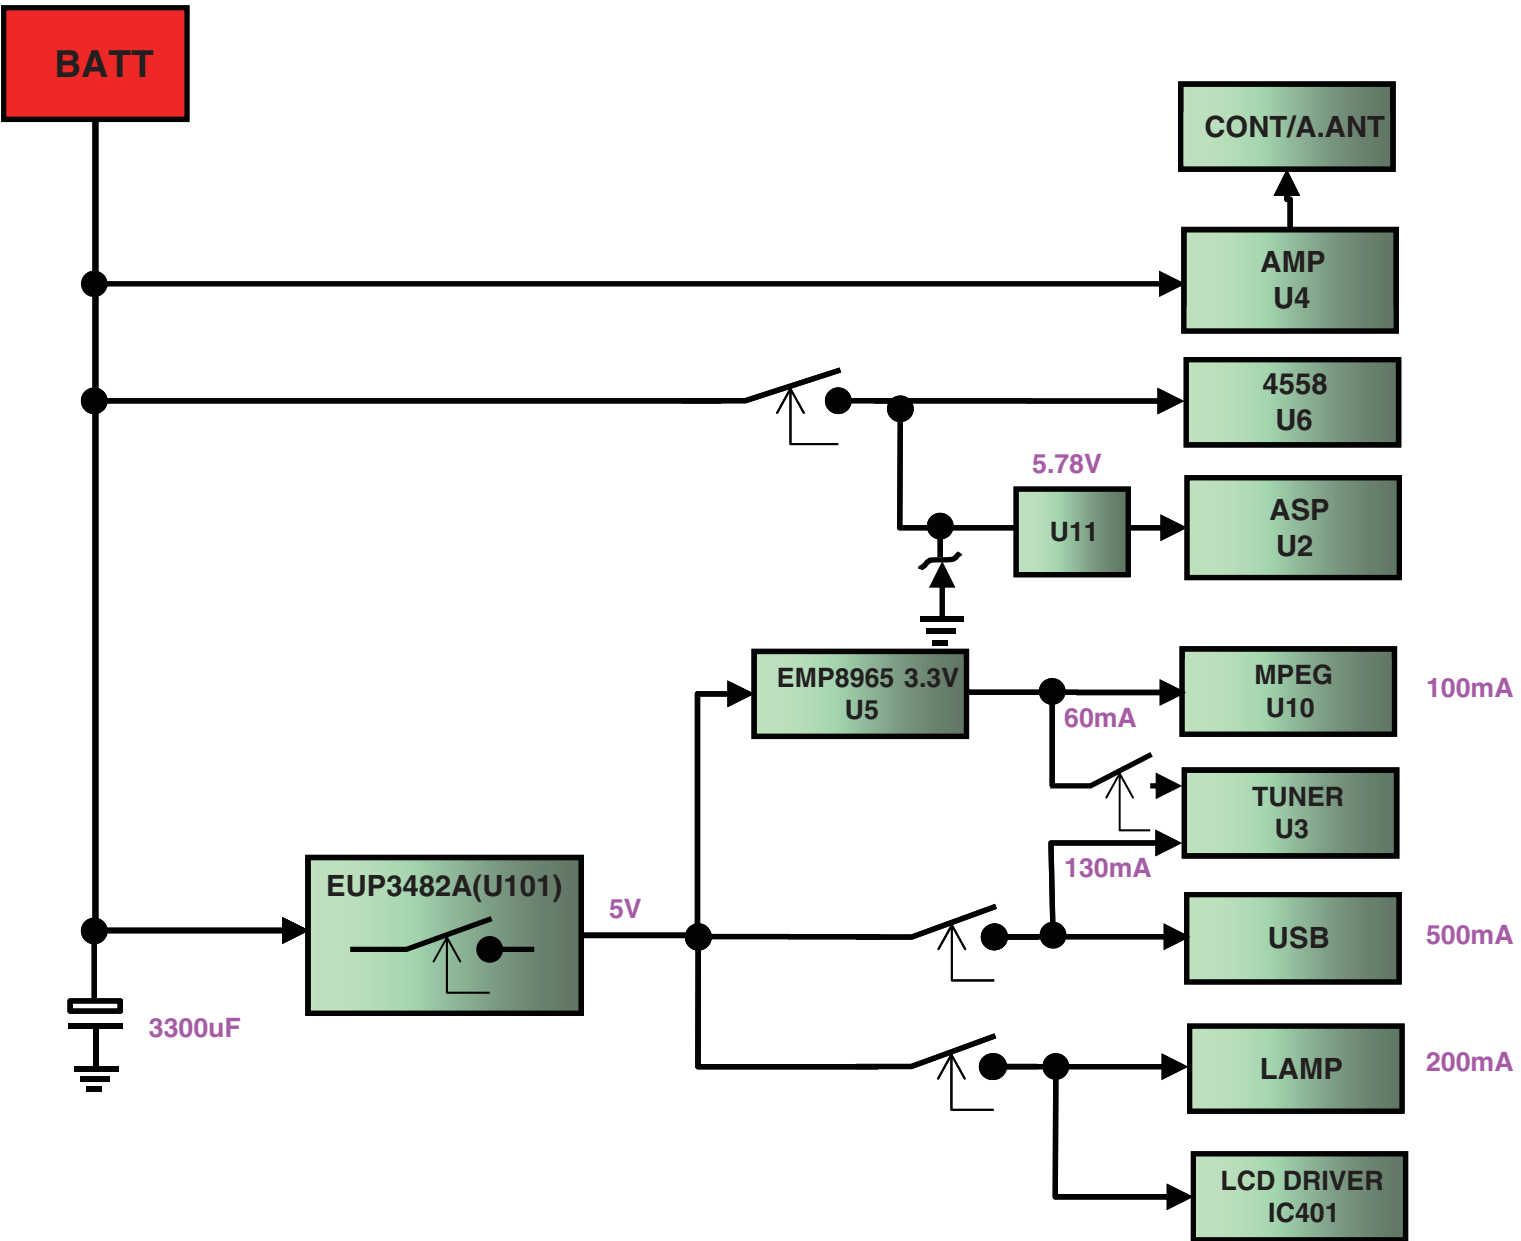

Item to be checked regarding audio
Distortion
Noise
Volume too low
Volume too high
Volume fluctuating
Sound interrupted

# 4. BLOCK DIAGRAM

## 4.1 BLOCK DIAGRAM

# 4.2 POWER SUPPLY SYSTEM FIGURE

# 5. DIAGNOSIS

## 5.1 TROUBLESHOOTING

Unable to turn on the power

- Check if the 10A blade fuse has not blown.
  - If the fuse has blown, check the voltage.
    - (Normal voltage)
    - Voltage when the source is off: 250 [mA]
    - Voltage at standby: 2.0 [mA]
  - If the voltage is not normal, replace MAIN BOARD PCB (completed set without front panel).
  - If you do not find any error, replace the fuse.

No sound from the speakers

- Change the source and check if you can hear sounds.
    - If you can hear sounds in a particular source, replace MAIN BOARD PCB (completed set without front panel).
    - If you cannot hear sounds in any source, check the the signal in the input of PowerAMP IC (U4).
- |     |           |    |
|-----|-----------|----|
| IN1 | U4 11-pin | FL |
| IN2 | U4 12-pin | RL |
| IN3 | U4 15-pin | FR |
| IN4 | U4 14-pin | RR |
- If you can find the signal, replace the PowerAMP IC.
  - If you cannot find the signal, replace MAIN BOARD PCB.

(Check Point)

No sound from the PreOUT

- Check the impedance between the Ground of PreOUT and the Ground of this product.
  - If the impedance is OPEN, replace the Poly Switch (FU1).
  - If the impedance is SHORT, replace MAIN BOARD PCB (Completed set without Front panel).

Detach grill does not work.

- Check the power of MAIN BOARD PCB (Connector J9 15-pin: A5V).
  - If the detach grill does not work normally, replace the MAIN BOARD PCB (Completed set without Front panel).
  - If the detach grill works normally, replace the detach grill (Detachable Assy).

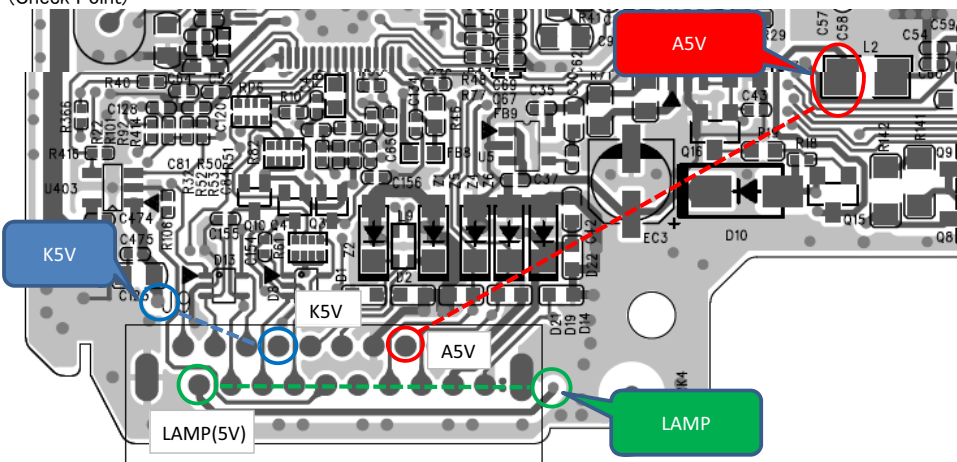

USB storage device is not recognized.

- Check the power of MAIN BOARD PCB (Connector J9 7-pin: K5V).
  - If an error occurs in the power, replace the MAIN BOARD PCB (Completed set without Front panel).
  - If you do not find anything error, replace the detach grill (Detachable Assy).
- \* You may also check the power of the MAIN BOARD PCB by checking the LED power status in the connected USB storage device.

Detachment is not illuminated.

- Check the power of MAIN BOARD PCB (Connector J9 2-pin: LAMP (5V)).
  - If an error occurs in the power, replace the MAIN BOARD PCB (Completed set without Front panel).
  - If you do not find any error, replace the detach grill (Detachable Assy).

(Check Point)

## 5.2 ERROR CODE LIST

### Common

#### AMP ERROR

- This unit fails to operate or the speaker connection is incorrect.
- The protective circuit is activated.
  - Check the speaker connection.
  - Check the power IC and its peripheral circuit.

### USB device

#### NO AUDIO

- There are no songs.
  - Transfer the audio files to the USB device and connect.
- The connected USB device has security enabled.
  - Follow the USB device instructions to disable the security.

#### SKIPPED

- The connected USB device contains DRM protected files.
  - The protected files are skipped.

#### PROTECT

- All the files on the connected USB device are embedded with DRM.
  - Replace the USB device.

### N/A USB

- The connected USB device is not supported by this unit.
  - Disconnect your device and replace it with a compatible USB device.

### CHECK USB

- The USB connector or USB cable has short-circuited.
  - Check that the USB connector or USB cable is not caught in something or damaged.
- The connected USB device consumes more than maximum allowable current.
  - Disconnect the USB device and do not use it. Turn the ignition switch OFF and back to ACC or ON. Connect only compliant USB devices.

### ERROR-19

- Communication failed.
  - Perform one of the following operations, then return to the USB source.
    - Turn the ignition switch OFF and back to ON.
    - Disconnect the USB device.
    - Change t

### ERROR-23

- USB device was not formatted properly.
  - Format the USB device with FAT12, FAT16 or FAT32.

## 6. SERVICE MODE

There is not information to be shown in this chapter.

## 7. DISASSEMBLY

While the photograph shown is slightly different from this model in shape, the disassembly procedure is the same.

### ● Removing the Panel Assy (Fig.1)

- ➡ 1 Release the two latches.
- ➡ 2 Release the two latches and then remove the Panel Assy.

Fig.1

### ● Removing the Main Board Assy (Fig.2)

- ➡ 1 Remove the screw.
  - ➡ 2 Remove the two screws.
- The Frame side is made a bottom.
- ➡ 3 Push the area and remove the two hooks.

- ➡ 4 Slide the Main Board Assy in the direction of the arrow and then remove the Main Board Assy.

Fig.2

### ● Removing the Main Board PCB (Fig.3)

- ➡ 1 Remove the two screws.
- ➡ 2 Straighten the tab at location indicated and then remove the Main Board PCB.

Fig.3

## ● Disassembling the Panel Part (Fig.4, 5)

1. Remove the lock while bending the rib of the panel upward.

Fig.4

2. Press the upside hook and the spike side hook of the spike at the same time, and pull out the spike.

Fig.5

## ● Assembling the Cabinet Part (Fig.6, 7, 8)

1. Attach the spike from the front side of the cabinet.

Fig.6

2. Attach the spring to the lock as shown in the figure.

Fig.7

3. Fit the spring in the groove at the position shown in the figure.
4. Fit the boss on the lower side of the lock in the lower hole of the cabinet, and then warp the rib on the cabinet in the direction shown in the figure and fit the boss of the lock in the cabinet.

Fig.8

## 8. EACH SETTING AND ADJUSTMENT

There is not information to be shown in this chapter.

# 9. EXPLODED VIEWS AND PARTS LIST

- NOTES :
- Parts marked by " \* " are generally unavailable because they are not in our Master Spare Parts List.
  - The  mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
  - Screw adjacent to  mark on the product are used for disassembly.
  - For the applying amount of lubricants or glue, follow the instructions in this manual.  
(In the case of no amount instructions, apply as you think it appropriate.)

## 12. ELECTRICAL PARTS LIST

### NOTE:

- Parts whose parts numbers are omitted are subject to being not supplied.
- The part numbers shown below indicate chip components.

#### Chip Resistor

RS1/○S○○○○J, RS1/○○S○○○○J

#### Chip Capacitor (except for CQS.....)

CKS....., CCS....., CSZS.....

- The  mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
- Meaning of the figures and others in the parentheses in the parts list.

Example) IC 301 is on the point (face A, 91 of x-axis, and 111 of y-axis) of the corresponding PC board.

IC 301 (A, 91, 111) IC NJM2068V

- The expression of the unit in this manual is shown by u instead of  $\mu$ . Please do not make a mistake.

#### Circuit Symbol and No.
